ENVIRONMENTAL POLICY

KCE are committed to a policy that protects and manages the potential environmental impact of its business operations or pollution on the surrounding environment or the community.

To achieve this, KCE is committed to:

- Identifying Environmental factors arising from our business activities and considering these factors in our business planning and decision making.
- Putting in place appropriate controls to protect the environment from identified aspects and impacts arising from our work activities.
- Consistently understanding and meeting the applicable statutory and regulatory requirements and those of our clients.
- Determining, addressing, maintaining and reviewing our internal and external environmental risks and opportunities that can affect our products and services, as well as enhancing client and stakeholder satisfaction.
- Ensuring that the environmental policy and objectives are established, communicated and reviewed and are at all times compatible with the context and strategic direction of the Company.
- Periodically reviewing the suitability and effectiveness of this policy and the Management Systems objectives in order to enhance environmental performance.
- Engaging, directing and supporting competent human and other resources to implement, maintain and continually improve the Environmental Management System
- Educating & training workers within the organisation to improve their skills, awareness & knowledge about environmental issues so as to assist them to work in an environmentally responsible manner.
- Continually pursue ecologically sustainable work practices and whenever possible reduce waste through economical and suitable recycling alternatives.

By establishing and committing to the above, KCE ensures through environmental leadership and adoption of best practice we can produce products and services that are environmentally friendly and that will enhance and improve the environment leading to a sustainable future.
